

# Frontend\_Intern\_Tasks

## Task 1: Login Screen

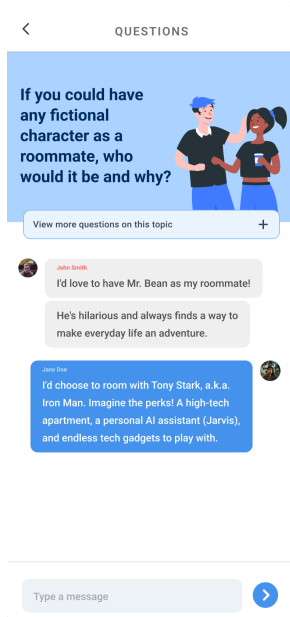

- Recreate Design: Implement the provided login screen using React.
- Features:
  1. Username: Must be non-empty and contain only alphabetic characters.
  2. Password: Must meet the following criteria:
    - At least 8 characters.
    - At least one uppercase letter, one number, and one special character.
  1. Show error messages for invalid inputs.
  2. Add a "Show Password" toggle.
- Navigation: On successful validation, navigate to the second screen.
- Responsiveness: Ensure the screen adapts to different mobile devices.

## Task 2: Questions Screen

- Recreate Design: Implement the scrollable questions list screen using React.
- Features:
  1. Display a list of questions using dummy data.
  2. Make the list vertically scrollable.
  3. Navigate to the third screen when a question is clicked.
- Navigation: Pass the selected question's data to the third screen.
- Responsiveness: Ensure the screen adapts to different mobile devices.

## Task 3: Question Chat Screen

- Recreate Design: Implement the chat screen for questions.
- Features:
  1. Display the question at the top using the data passed from the previous screen.
  2. Take a random message as input, and after clicking the "Send" button:
    - Add the input as a new message on the screen.
    - Clear the input field.
- Ensure that the message list is scrollable.
- Responsiveness: Ensure the screen adapts to different mobile devices.
